Alex Martínez

AI Engineer · LLMs, RAG & MCP

alexmtzai2002@gmail.com · +49 171 4758416 · Germany · linkedin.com/in/alexmtzai · github.com/luis12007 · Portfolio

Work authorisation: Germany Opportunity Card (Chancenkarte, § 20a AufenthG)

PROFILE

AI Engineer with 5 years of experience and a truly end-to-end profile: in my last two roles I have taken AI products from the first requirements conversations, through hands-on engineering, all the way to leading the team that ships them, working with state-of-the-art models both via API and self-hosted. I recently moved to Germany, where I will begin my M.Sc. in Artificial Intelligence in April 2027, and I am looking for my next AI engineering challenge. I would be delighted to meet you.

EXPERIENCE

AI Engineer Lead (promoted from AI Engineer) · TELUS

- Led a team of up to 15 AI engineers in a hybrid role that blended people management with hands-on engineering, tracking delivery, unblocking work and keeping senior leadership up to date
- Built the team's way of working from the ground up (CI/CD, engineering standards, documentation and security compliance), giving every engineer a shared, reliable path from idea to production
- Kept a team that was restructured from 15 to 10 people (3 leads, 7 engineers) aligned and growing through knowledge-transfer sessions, 101 trainings and regular updates on new technologies
- Designed and shipped several MCP servers and APIs from scratch on our own GCP infrastructure, connecting the client's LLM to the tools it needed and taking each integration from requirements to production
- Ran the evaluation of moving from API-based to self-hosted, on-premise LLMs, measuring hallucination, RAG consumption, speed, accuracy and cost with DeepEval and turning each finding into a clear recommendation
- Worked side by side with the client and the Product Owner to turn business needs into new features, and delivered 2 AI-first projects that are still running in production today

Founder & Software Engineer · MySoftwareSV, El Salvador

- Founded and ran my own software company, owning every stage for clients from requirements and architecture to delivery and support across web, SaaS, ERP, CRM, desktop and mobile products
- Built a SaaS billing platform (React + custom REST API) that automates invoicing, payment tracking and notifications while meeting government e-invoicing standards
- Extended it into an enterprise billing API in Java Spring Boot so large companies could plug government-mandated digital billing into their own systems, on a multi-server AWS setup
- Delivered a multi-branch ERP in C# .NET that brought POS, inventory for 3 branches, HR/payroll and sales insights together in one cloud-based system
- Shipped a cross-platform app (web, Android, iOS) that lets gymnastics judges score MAG/WAG routines following FIG rules and export results to PDF

Machine Learning Engineer (open source) · Omdena, Remote

- Reached 84% accuracy predicting diseases from symptoms for illnesses prevalent in Africa, by comparing Random Forest, Gradient Boosting and neural network models within a 50+ person international team
- Owned data collection, exploratory analysis and feature engineering, and turned the results into a Streamlit app with clear documentation for the community

PROJECTS

RAG Portfolio Assistant

LangChain RAG assistant over my portfolio with vector search and a self-quantized LLM running CPU-only on DigitalOcean

AI Language Learning App · vocabulary-app-production-34bb.up.railway.app

Personal prototype for ES/EN/DE with AI image generation, AI translation checks, pronunciation scoring and spoken conversations with an AI tutor

Judge Gymnasts App · github.com/luis12007/mobile_app_gymnastics

React Native/Expo app for gymnastics judges with FIG-compliant scoring calculators, digital whiteboard and PDF export

EDUCATION

04/2027 – 04/2029 **M.Sc. Artificial Intelligence** · IU International University of Applied Sciences

Upcoming, starting April 2027

08/2025 **Bachelor in Software Engineering** · Universidad Centroamericana "José Simeón Cañas" (UCA)

SKILLS

LLMs & GenAI	Prompt engineering, LLM APIs, RAG, MCP servers, self-hosted LLMs, DeepEval, LangChain, model quantization
ML & Data	PyTorch, TensorFlow, Keras, scikit-learn, Pandas, Matplotlib, Seaborn
Cloud & DevOps	GCP (Vertex AI, BigQuery, Cloud Functions), AWS (EC2, S3), DigitalOcean, Docker, Jenkins, CI/CD, Linux, NGINX, Dynatrace, PagerDuty
Software	Python, Java Spring Boot, C# .NET, React, React Native/Expo, Django, REST APIs
Leadership	Team coordination, KT & training, stakeholder reporting, product discovery, security compliance

LANGUAGES

Spanish Native · English C1 · German A2

CERTIFICATIONS

TensorFlow for Deep Learning Bootcamp · Zero To Mastery	06/2025
Leveraging NLP in Medical Prescription · Omdena Local Chapter	05/2025
PyTorch for Deep Learning Bootcamp · Zero To Mastery	04/2025
Complete A.I. & Machine Learning, Data Science Course · Zero To Mastery	01/2025
Algorithms and Data Structures · Zero To Mastery	12/2024
AWS for Developers, Linux, SQL and more · LinkedIn Learning	12/2024
Data Science and Python Basics · Omdena Academy	12/2024
Machine Learning Basics · Omdena Academy	11/2024
Fundamentals of AI & Machine Learning Program · Zero To Mastery Academy	06/2024
